

BMCS2063 Data Structures and Algorithms - Assignment Rubrics 202605

Team members:	,,,	
Tutor Name:		
Assessment Criteria	Developing 1 - 4 Marks	Approaching 5 - 7 Marks
ADT specification	Includes 2 or more of the the items listed under "Approaching".	• Incomplete information OR • Unclear/inaccurate descriptions OR • Includes details of the ADT implementation or entity objects.
Collection ADT Implementation	Includes 2 or more of the the items listed under "Approaching".	• Inconsistent with ADT spec. OR • Implementation is not generic OR • Coding is not efficient or elegant.
Collection ADT implementation - originality	Does not demonstrate any originality of implementation & application of new knowledge.	• The ADT has not been covered in the course OR • Includes additional/modified operations that are non-trivial and meaningful.
Comments:		

	Team marks:		0
Programme&Group: e.g:RSW2 G1			
Ideal 8 - 10 Marks	Marks Awarded	Weightage	Weighted Marks
• Correct format AND • Complete information AND • Clear & accurate descriptions.		1	0
• Consistent with ADT spec. AND • Correct use of generic types AND • Efficient & elegant coding.		1	0
• The ADT is not covered in the course OR • The implementation approach is different from the sample code.		1.5	0

BMCS2063 Data Structures and Algorithms - Assignment Rubrics 202605

Assessment Criteria	Developing 1 - 4 Marks	Approaching 5 - 7 Marks
ADT specification	Includes 2 or more of the the items listed under "Approaching".	• Incomplete information OR • Unclear/inaccurate descriptions OR • Includes details of the ADT implementation or entity objects.
Collection ADT Implementation	Includes 2 or more of the the items listed under "Approaching".	• Inconsistent with ADT spec. OR • Correct use of generic types OR • Coding is not efficient or elegant.
Collection ADT implementation - originality	Does not demonstrate any originality of implementation & application of new knowledge.	• The ADT has not been covered in the course OR • Includes additional/modified operations that are non-trivial and meaningful.
Use of ADTs - either in entity and/or control class(es)	• Inappropriate selection of ADT AND • Inappropriate use of ADT.	• Appropriate selection of ADT OR • Appropriate use of ADT.
Use of ADTs - creativity & complexity	The functionalities/features in the entity and/or control classes do not demonstrate any use of ADTs.	The functionalities/features in the entity and/or control classes are creatively designed to demonstrate the use of the ADT.
Overall Solution	• There is one or major bugs AND • Code is not integrated completely OR • Entire module use of AI code generation (limited)	• No major bugs AND • Code is partially integrated OR • Minimal use of AI code generation (helper).
CLO2 Produce a software program using app		
Note: Students are required to obtain a pass mark (i.e., at least 40 marks) for		
Oral explanation on the implementation & use of ADTs.	• Unclear explanation about ADT implementation AND • Unclear explanation on the use of ADTs	• Unclear explanation about ADT implementation OR • Unclear explanation on the use of ADTs
Code proficiency	• Demonstrate minimal understanding of code.	• Demonstrate partial coding proficiency with some support
CLO3 Explain the implementation and appropriateness of
