

TUNKU ABDUL RAHMAN UNIVERSITY OF MANAGEMENT AND TECHNOLOGY ACADEMIC	EFFECTIVE DATE:	1-May-2026
	REVISION DATE:	-
TAR UMT ARTIFICIAL INTELLIGENCE (AI) GUIDELINES FOR STUDENTS	REF. NO.:	PO/113:26 (R0)
	TOTAL PAGE:	5

1. Purpose

These guidelines aim to promote the responsible and appropriate use of Artificial Intelligence (AI) as a learning aid among students, while fostering AI literacy, upholding academic integrity, and preserving the originality and authenticity of academic work.

2. Scope

These guidelines apply to all students of the University across all modes of delivery. The guidelines cover the use of AI tools in continuous assessments, research projects, theses, and dissertations.

3. Guiding Principles

- 3.1 The University recognises the potential of AI tools to enhance learning engagement and academic skill development.
- 3.2 Students shall not be restricted from accessing AI tools or relevant technologies that may support their learning, provided such use complies with these guidelines.
- 3.3 AI tools may be used to support learning activities such as brainstorming, preliminary idea generation, language enhancement, conceptual clarification, and skill development, within the scope of assigned academic tasks.
- 3.4 AI tools shall not replace independent thinking, critical analysis, academic judgement, or scholarly contribution.
- 3.5 Documents or information involving the non-disclosure of sensitive research, materials covered under Non-Disclosure Agreements (NDAs) with industry partners, or personal data are strictly prohibited from being shared with or processed through public AI models.

4. Responsibilities of Students

- 4.1 Students are responsible for ensuring that all academic work submitted for assessment purposes is original and reflects their own understanding, effort, and academic judgement.
- 4.2 AI tools may be used as a learning aid but shall not be used to generate complete academic work or replace independent scholarly effort.
- 4.3 Students shall critically review, verify, and take full responsibility for the accuracy, relevance, and appropriateness of any content generated with the assistance of AI tools, including evaluating it for potential cultural, racial, gender, or other biases, and ensuring alignment with ethical standards, inclusivity, and scholarly principles.
- 4.4 Any use of AI tools must be clearly acknowledged in accordance with University requirements.

5. Academic Integrity and Plagiarism

- 5.1 Students shall uphold academic integrity and comply strictly with the university's plagiarism policy.
- 5.2 The University treats plagiarism, misuse of AI tools, violation of intellectual property and copyright laws, deceptive fabrication, and all forms of academic dishonesty as serious offences.
- 5.3 Academic work that merely reproduces AI-generated content without critical input, contextualisation, modification, or proper acknowledgement constitutes academic misconduct.
- 5.4 Lecturers and supervisors may, at their discretion, request supporting evidence, drafts, explanations, or process documentation where misuse of AI tools is suspected.

6. Red–Yellow–Green Framework adopted for AI Use in Assessment

To ensure clarity, transparency, and consistency in the use of AI in teaching and assessment, lecturers must categorise assessments according to the following three levels of permissible AI usage:

- **Green (AI-Supported):** AI is encouraged for brainstorming, outlining, and tutoring, subject to the requirements of the assigned task.
- **Yellow (Limited AI):** AI tools may be used for specific and clearly defined purposes, such as data analysis, language refinement, or technical support. However, AI tools shall not be used to generate core arguments, critical analysis, or original academic content.
- **Red (No AI):** The use of AI tools is strictly prohibited in order to ensure the development and demonstration of foundational knowledge, skills, and competencies.

7. Declaration and Acknowledgement of AI Use

- 7.1 Students are required to submit an AI similarity report from TURNITIN together with their Final Year Project, dissertation, or thesis for supervisory review. The AI similarity report shall be assessed by the respective supervisors.
- 7.2 Students are mandated to declare the use of AI tools for coursework, projects, theses, or dissertations by completing and signing the prescribed AI Usage Disclosure Form.
- 7.3 The declaration shall include:
 - AI Tool(s) Used
 - Nature of Assistance
 - Disclosure Statement
 - Verification & Integrity

8. Disciplinary Action

- 8.1 Any suspected plagiarism or misuse of AI tools without proper acknowledgement shall be treated as academic misconduct.
- 8.2 All plagiarism and AI misuse cases shall be managed by the respective Faculty, Centre, or Branch.
- 8.3 Serious cases may be referred to the University's Student Disciplinary Committee in accordance with existing regulations.

9. Conclusion

These guidelines aim to promote responsible and informed adoption of AI tools as an educational support mechanism rather than a substitute for academic effort. By clearly defining acceptable use, responsibilities, and consequences, the University seeks to enhance students' ethical awareness, digital literacy, and academic quality while upholding academic standards across all programmes.

AI Usage Disclosure Form

Student Name: _____

Programme: _____

Course: _____

Assessment Title: _____

1. AI Tool(s) Used (Check that all that apply)

- ☐ None (I did not use any AI tools for this assignment)
- ☐ ChatGPT (Version: _____)
- ☐ Deepseek
- ☐ Gemini
- ☐ Other: _____

2. Nature of Assistance (Check all that apply)

- ☐ **Brainstorming:** Generating ideas, topics, or outlines.
- ☐ **Research:** Summarising long articles or finding concepts.
- ☐ **Editing:** Checking grammar, spelling, or sentence structure.
- ☐ **Coding/Math:** Debugging code or explaining a formula.
- ☐ **Creation:** Generating images, data, or draft text.

3. Disclosure Statement

Provide a brief explanation of how AI tools were utilised in completing the task and describe the measures taken to ensure that the final submission reflects your own independent work.

Example:

"I used ChatGPT to structure my initial ideas into an outline. Subsequently, I composed the full paragraphs independently and cross-checked the referenced dates against my textbook to ensure accuracy."

Your Statement:

4. Verification & Integrity

- ☐ I have reviewed and verified the accuracy of all facts, data, and citations generated with the assistance of AI tools.
- ☐ I have properly acknowledged and cited any AI-generated text, ideas, or content in accordance with my instructor's requirements.

- [] I confirm that the reasoning, interpretation, and analysis presented in the final submission are entirely my own.
